B.A.S.E.
La proposta nasce con l’obiettivo di offrire ai progettisti uno strumento completo, in grado di unire funzionalità e ricerca estetica.

B.A.S.E. è un sistema articolato di collezioni tra loro complementari e combinabili, pensato per esplorare e valorizzare l’essenza originaria della ceramica: la materia.
Il nome stesso è un acronimo che richiama i quattro elementi fondamentali attorno a cui si sviluppa il progetto:
B – Bark: texture ispirate al legno, in equilibrio tra naturalezza e design.
A – Adobe: Il termine "adobe" significa letteralmente: Mattone crudo di terra e paglia, essiccato al sole. Adobe è una miscela di terra argillosa, sabbia, acqua e spesso paglia, modellata in blocchi e lasciata asciugare al sole.
S – Stone: la pietra come elemento fondante, punto di partenza del nostro percorso e cuore del progetto Stone Lab.
E – Embellishment: l’elemento decorativo che arricchisce e completa il progetto, con strutture e superfici raffinate.

B.A.S.E. non è solo una collezione, ma un linguaggio progettuale: un invito a riscoprire il valore della materia ceramica nella sua forma più pura, e a reinterpretarla in chiave contemporanea, fornendo all’utente immediate soluzioni di abbinabilità tra le finiture che lo compongono.

B.A.S.E.
The project was created to offer designers a comprehensive tool, capable of combining functionality with refined aesthetic research.

B.A.S.E. is a structured system of collections, complementary and completely combinable, designed to explore and enhance the original essence of ceramics: matter.
The name is an acronym that embodies the four fundamental elements around which the concept develops:
B – Bark: textures inspired by wood, balancing natural authenticity with refined design.
A – Adobe: the term “adobe” literally means: a raw brick of earth and straw, sun-dried. Adobe is a blend of clay soil, sand, water, and often straw, shaped into blocks and dried under the sun.
S – Stone: stone as a foundational element, the starting point of our journey and the essence of the Stone Lab project.
E – Embellishment: the decorative dimension that enriches and completes the project with refined structures and surfaces.

B.A.S.E. is more than a collection: it is a design language, an invitation to rediscover the intrinsic value of ceramic material in its purest form, and to reinterpret it through a contemporary lens, offering users immediate and versatile solutions for combining its diverse finishes.
