

COSMO

Cosmo, Cercom's laboratories new porcelain stoneware project, is the outcome of a passion for invention and aesthetic research that evolves in step with living styles. Texturally appealing, a natural stone with a composite graphic texture, it yields to moulding to the extent of originally conveying content inspired by the lunar surface's charm. The result is a versatile product, a distinctive and characteristic sign for interior design and outdoor projects, capable of interacting with matter, colours and architectural lines.

Fascinating and full of amazingly three-dimensional details, Cosmo's surface plays with natural light, disclosing reflections and shading that highlight its graphic depth. The collection, a product of state-of-the-art production technology, is available in an indoor version with a natural finish, that comes in four sizes, and in several outdoor options with grip R11 finish, both in sizes with normal thickness and in the practical 2 cm-thick 60x120 cm size.

The four colours, namely Comet Cream, Darkside, Starlight and Meteor Grey, are contained in a minimalist and neutral palette that satisfies the latest residential design trends and offers eclectic contents to be adopted in commercial and public spaces, as well as in wellness facilities, spas and swimming pools.
